DARKROOM · EXPLODED

NOT TO SCALE

The loaded sled leaves through the open front; the diffuser lifts off its rails.

1 Body
one-piece open-front enclosure, corner posts inside

2 Sled
front plate + floor + rails + rear bulkhead, one part

3 M3 screw heads ×4
low-head, flush; heads only in CAD

4 Display, ST7789 1.3″
glass in a plate pocket, PCB behind; fit unverified

5 Button caps ×4
2×2 grid, Select red

6 Tact switches ×4
12 mm switches on 16 mm carrier boards

7 microSD reader
placeholder board; USB link to the Pi not modelled

8 Pi Zero 2 W
65 × 30 board, 2×20 header

9 PiSugar 3
battery board under the Pi; thickness unverified

10 Diffuser shelf
white 1.2 mm shelf on the sled rails

11 Safelight
two 5 mm LEDs on a breakout

Concept geometry from cad/darkroom.scad (v0.4); not a fabrication drawing or a confirmed build. The microSD reader is a placeholder board; display and PiSugar fit, retention and cabling are unverified.
